

In an effort to keep our campers, staff, volunteers, and families safe, Susquehanna United Methodist Camp and Retreat Ministries (SUSCRM) will implement the following COVID-19 Health and Safety Plan. A summarized version of this plan can be found on our website. These will remain in effect through the entirety of the summer season, or until otherwise revised.

Our Camping Ministry consists of three distinct centers that offer summer camp programs - Camp Penn, Greene Hills, and Wesley Forest. The below guidelines are our general practice across all centers. Detailed logistics of how these guidelines are practiced at each unique center will vary based on location. If interested in obtaining details specific to your camp event this summer, please contact the Center Director of your camp location.

Updated June 4, 2021

Susquehanna United Methodist Camp and Retreat Ministries (SUSCRM) COVID19 Health and Safety Plan

Guiding Principles

Risk-Number of Campers and Setting Description

- Camp will operate at 75% capacity for the summer.
- Limited capacity cabin groups will be comprised of at least two counselors and at most, 75% of normal camper capacity for the assigned cabin. Note: Specific cabin camper-to-counselor ratios will vary from center to center due to lodging layouts at each location.
- A Cabin Group will live together for the week. Cabin Group members will not need to wear masks when they are with only their Cabin Group.
- When campers are present in a cabin, windows will be opened, and fans turned on to prompt additional airflow and ventilation.
- A Family Group will function as a cohort that will participate in activities together for the duration of the camp session. A Family Group will consist of combined cabins of the same age. If age appropriate, and at the approval of the parents/guardians, siblings will be assigned to the same Family Group when possible. A Family Group will wear masks when they are indoors together. Family Groups do not need to wear masks outdoors except in crowded settings or during sustained close contact activities. Family Groups must maintain 6 feet of distance from other Family Groups. *NOTE: Camps for special needs individuals will continue to have campers, volunteers, and staff wear masks/face coverings for the duration of the camp event as required by the Pennsylvania Office of Developmental Programs (ODP). See Face Mask/Coverings section of this plan for more details.*
- Few activities will occur as a large all-camp group. When multiple Family Groups are indoors together, masks will be worn by everyone. When multiple Family Groups are outdoors together, Family Groups must maintain 6 feet of distance from other Family Groups.
- In special cases, the Family Group size may be adjusted to meet the needs of the campers and the program.
- At no time will a member from one established Family Group intermingle with another group.
- Priority will be placed on holding activities outside. In the case of inclement weather, each Family Group will have their own designated indoor space away distanced from other groups. If a designated indoor space is not available, then cabin groups will return to their sleeping units where cabin group activities will be led by the cabin counselors.

Behaviors to Reduce Spread

· Vaccination

- All eligible staff, volunteers, and campers are strongly encouraged to receive a COVID-19 vaccination and be fully vaccinated at least two weeks before arriving at camp.
 - Click to learn more about [COVID-19 Vaccines for Children and Teens](#)
 - Click to find out where you can [get vaccinated in your community](#).

Education of COVID19 Signs/Symptoms

· When campers should stay home/not attempt to attend camp

- Please see the [Family COVID19 Covenant](#) and the [Required 14 Day Pre-Camp Health Practice Form](#) for information regarding when we're asking campers to stay home/not attend camp.

· When volunteers/staff should not come to work

- Any employee or volunteer who is showing COVID19 symptoms, have tested positive for COVID19, or have recently had a close contact with a person with COVID19 are to stay home from work. To return to work, employees will follow CDC Guidelines.
 - If an employee tests positive or shows symptoms: <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>
 - If an employee has had close contact with a person with COVID19: <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/quarantine.html>
- Additionally, all employees and volunteers will be asked to complete a Covenant/Expectation Practice prior to beginning their service at camp.
 - Staff
 - Covenant/Expectations
 - Hired Staff who are not fully vaccinated will be asked to provide a negative viral test taken no more than 3 days before arriving at camp.
 - [Required 14 Day Pre-Camp Health Practice Form](#)
 - Volunteer
 - Covenant/Expectations
 - Volunteers who are not fully vaccinated are strongly encouraged to get a viral test taken no more than 1-3 days before arriving at camp.
 - [Required 14 Day Pre-Camp Health Practice Form](#)

· Screening Procedures

- SUSCRM asks all campers, volunteers, and staff to complete a Required [14 Day Pre-Camp Health Practice Form](#) prior to their week of camp. This guided form for all campers and volunteers lists specific pre-camp social expectations, asks for daily temperature and self-assessment health checks. In the two weeks prior to camp be prepared to follow [CDC guidelines for Choosing Safer Activities](#).
- Hired staff who are not fully vaccinated will also be required to do routine screening/monitoring during camp that consists of daily symptom and temperature checks.
- Volunteers who are not fully vaccinated are strongly encouraged to get a viral test taken no more than 3 days before the start of their week of camp.
 - Those with with a positive viral test will delay their arrival until after the quarantine period.
- Prior to exiting the vehicle during camper drop off, campers will be screened for COVID19 symptoms via a temperature check and answering a series of questions related to COVID19 exposure. Campers who show symptoms at during drop off will be asked to return home and reschedule for an event later in the summer.
- Routine screening/monitoring of volunteers and campers during camp will consist of daily symptom and temperature checks. The time of day this is done will vary across each unique camp center.
- If a potential symptom of COVID19 is discovered during routine daily monitoring, the follow-up steps described later in this document will be followed.

- **Hand Hygiene and Respiratory Etiquette**
 - **Adequate Hand Washing**
 - Handwashing and hand sanitizer will be available and used frequently before and after meals, activities, and interactions.
 - Signage will be posted near handwashing stations to encourage proper hand washing.
 - **Coughing and Sneezing Etiquette**
 - Campers will be informed of safe coughing and sneezing etiquette at the beginning of camp and reminded as necessary throughout the week by signage, counselors, deans, and camp staff.
- **Face Mask/Coverings**
 - **Campers, Staff, and Volunteers**
 - All campers, staff, and volunteers:
 - WILL be expected to wear a mask when:
 - Indoors with anyone other than Cabin Group
 - In close contact or crowded settings outdoors
 - WILL NOT be expected to wear a mask when:
 - Outdoors
 - Sleeping, eating, brushing teeth, showering, swimming
 - Indoors with Cabin Group
 - Masks will be worn when multiple Family Groups are gathered for singing/chanting activities outdoors.
 - Campers and volunteers should come to camp with a minimum of 10 masks for the week of camp. Masks should be marked with the camper names or initials. Masks must have at least two layers of fabric and fit around the mouth and nose. Please no single layer neck gaiter style masks or bandanas.
 - Basic cloth masks will be provided for anyone who needs them.
 - If a camper, staff, or volunteer is unable to wear a face covering while indoors during summer 2021, then we ask that they wait until next summer to register.
 - **Special Needs Camps**
 - Campers (vaccinated and unvaccinated) should plan to wear face masks/coverings for the duration of the camp event except in time of sleeping, eating, brushing teeth, showering, water activities, or when outside and 6 feet of distance can be maintained.
 - All volunteers of Special Needs Camps who are providing direct services (aiding in dressing, hygiene, swimming, feeding, etc) must wear a mask that covers the volunteer's nose and mouth during the entirety of the direct service. The mask must be a double layer cloth mask or other mask that offers a higher degree of protection.
- **Adequate Supplies**
 - We will keep an adequate supply of the following:
 - Handwashing sinks
 - Hand sanitizer
 - Additional paper towel dispensers
 - Additional tissues
 - Additional masks
 - Touch-free trashcans
 - Supplies for camp medical/cleaning staff will be kept in the nurse's lodge should they need to interact with individuals with COVID19 symptoms.
 - N95 masks
 - Face shields
 - Disposable gloves
 - Disposable aprons

· **Signs and Messages**

- During camp welcome on the first day of camp, staff and volunteers will communicate COVID19 safety measures (masks, distancing, handwashing, etc) with all campers as they enter into a week of living in community during a pandemic. Throughout the week of camp, general reminders and announcements can be made. Day-to-day reminders will be given by volunteers and staff as they monitor the overall practice of health and safety measures.
- Signs will be posted throughout camp, in highly visible locations (dining areas, bathrooms, cabins/lodging areas) that will remind campers, staff, and volunteers of our everyday protective measures, how to stop the spread, how to properly wash hands, and reminders for properly wearing a mask.

Maintaining Healthy Environments

· **Cleaning and Disinfecting**

- Commonly touched communal surfaces such as doorknobs, light switches, and water bottle fillers will be disinfected regularly at least once per day by camp staff and recorded on a daily cleaning log. Staff cleaning schedule will be determined by the Center Director.
- Program equipment (rec equipment, arts and crafts supplies, games, etc) must be cleaned with disinfectant between each use by supervising camp staff or volunteers and recorded on a daily cleaning log.
- Restrooms, bathrooms, and other shared communal spaces will be thoroughly cleaned daily (at minimum) using disinfectant. Cleaning checklists will be provided to volunteers and campers if they are the ones charged with performing the cleaning of these spaces (in cabin bathrooms for example). Daily cleaning checklists will be submitted to the volunteer Dean who is responsible for overseeing the cleanliness of camper sleeping areas. When a common space (dining area, craft area) is cleaned by trained staff, then the cleaning schedule will be determined by the Center Director and a cleaning log will be recorded.
- If a communal indoor space is being heavily used throughout the day, campers with their volunteer counselors will be led by trained staff to assist in cleaning the area as they exit using disinfectant.
- Campers, with help from their volunteer counselors, will do daily cleaning and sanitation of their sleeping quarters. Each cabin area will be provided with a sanitizing kit for the week that will include disinfectants (sanitizing wipes and/or spray, paper towels) and protective cleaning supplies (gloves). This kit will also include a daily cleaning checklist for each cabin/sleeping area to follow. Daily cleaning checklists will be submitted to the volunteer Dean who is responsible for overseeing the cleanliness of camper sleeping areas. Volunteer counselors are charged with maintaining a fully supplied cleaning kit.

· **Shared Objects/Space**

- Shared camp objects (playground equipment, art supplies) must be cleaned between Family Group use. At each shared space, including storage areas of shared objects, a cleaning kit will be available that will include hand sanitizer (to be used before and after an object is touched), sanitizing wipes or spray and paper towels, and cleaning instructions.
- Volunteer counselors are responsible for ensuring that playground equipment and other shared objects are sanitized between use.
- Through signs and verbal communication, campers will be instructed to keep their personal items in their own space in each sleeping area. Campers and volunteers may not share, mix, or touch one another's personal items. If a counselor needs to assist a camper with any personal items (washing bedding) then gloves and trash bags supplied in the cabin cleaning kit will be used.

· **Ventilation**

- All indoor facilities where campers and volunteers are present (cabins, dining areas, meeting rooms, rec areas, bathrooms) will have all windows open at all times. If an exhaust fan is present in a sleeping area, that fan will run for the duration of the sleeping hours to facilitate ventilation.

Water Systems

- All camp centers complete monthly potable water tests as required by the DEP.
- Wesley Forest completes a weekly water sample of the lakefront swimming area.
- Campers are encouraged to bring a reusable water bottle, to be used and touched by only that camper, to their camp event. At times of high use, one gloved staff member or volunteer, will be in charge of helping campers re-fill their water bottles. Campers will maintain contact with their bottle at all times, but the gloved volunteer or staff member will operate the water spigot. At times of low use, campers may fill up their own water bottle by touching the water spigot (after sanitizing their hands) and sanitizing the spigot between use. Signs will be placed on all water coolers that define this process.
- If sinks in bathrooms are not already spaced six feet apart, then every other sink will be blocked off for use.
- If a cabin group is sharing a bathroom facility (bath house, communal bathrooms with showers) only one cabin group may be using the facility at a time. Cabin groups and individuals are responsible for wiping down shower faucet and handles with sanitizing wipes or spray when they leave the shower stall.

Modified Layout

- Cabins are limited to 75% capacity and six feet of distance between camper heads for sleeping.
 - Bunks/beds will be marked for the duration of the summer season to ensure proper distancing. Beds that cannot be used because they do not meet distancing will be blocked off. Orientation of campers (head and feet) will also be marked on each bunk.

Physical Barriers/Guides

- Summer programs and activities will take place outside as much as the weather permits this summer. In the case of severe weather, only cabinmates will return to their cabin for indoor programming led by their cabin counselor (creative arts, Bible Study, etc). We consider thunder and lightning severe weather. If it is just raining, we will be outside.
- In common gathering areas (dining area, arts and crafts, pavilions, etc) the floor/ground will be marked off for six feet of distancing between individuals or Family Groups.
- Where feasible, in buildings where multiple Family Groups can gather, one way direction will be given as campers and volunteers move throughout the building. If one way direction and/or distancing is not possible in a building, then only one Family Group may be in that building at a time.

Communal Spaces

- Family groups will not co-mingle in indoor communal spaces. Only one family group may occupy a set space in communal areas. i.e. Family Group A in North end of dining hall, Family Group B in South end of dining hall. In communal spaces where square footage or layout does not allow proper social distancing, schedules and staggered mealtimes will be set by the Center Director prior to the start of camp to ensure only one Family Group using a communal space at a time.
- See Cleaning and Disinfecting to read our plan for sanitizing communal spaces.

Food Service

- To-go meals via a cafeteria style serving line (one staff member or volunteer to dish out a designated food item) or prepacked meals will be served 3 times a day.
- Only one Family Group will come through the serving line at a time as determined by staggered mealtimes.
- Each Family Group will then go to their own designated place to eat. As weather permits, meals will happen anywhere outside that a group chooses to go (pavilion, lawn, picnic table). In the case of inclement weather, cabin mates will go to their cabins to eat meals with their cabin counselors. In some circumstances, Family Groups may be seated inside the dining area but only when six feet of distance can be maintained between individuals.

Maintaining Healthy Operations

· **Protections for High-Risk Campers**

- Attending camp is a personal choice. For high-risk campers that choose to come to camp and are approved by their physician to attend camp, we will work with camper families and physicians to create an individual plan for that specific camper that is feasible within constraints of a camp setting. If the additional restrictions and protocols of an individual plan are beyond what can be consistently implemented in a communal camp setting, the camper will be asked to wait to attend camp when the spread of COVID19 is less problematic.

· **Regulatory Awareness**

- Any suspected or confirmed cases of COVID19 at camp will be reported to the camp physician and the County Health Department for consultation and guidance.

· **Small Groups and Cohorting**

- A Family Group will function as a cohort that will participate in activities together for the duration of the camp session. A Family Group will consist of combined Cabin Groups of the same age. If age appropriate, and at the approval of the parents/guardians, siblings will be assigned to the same Family Group when possible. A Family Group will wear masks when they are indoors together. Family Groups do not need to wear masks outdoors except in crowded settings or during sustained close contact activities. Family Groups must maintain 6 feet of distance from other Family Groups. *NOTE: Camps for special needs individuals will continue to have campers, volunteers, and staff wear masks/face coverings for the duration of the camp event as required by the Pennsylvania Office of Developmental Programs (ODP). See Face Mask/Coverings section of this plan for more details.*
- Few activities will occur in large, all-camp settings. When multiple Family Groups are indoors together, masks will be worn by everyone. When multiple Family Groups are outdoors together, Family Groups must maintain 6 feet of distance from other Family Groups.
- At no time will a member from one established Family Group intermingle with another group.

· **Staggered Scheduling**

- Arriving at Camp
 - Campers will be assigned a check-in time at increments. Camper families will receive scheduled arrival time two weeks prior to the start of the camp session.
 - We ask that camper families avoid carpooling to get to and from camp. Churches and Organizations wishing to transport campers together must be in contact with the Center Director prior to transportation.
 - Campers may exit the vehicle only after they have checked in with the Camp Nurse or designated health person.
 - Prior to exiting the vehicle during camper drop off, campers will be screened for COVID19 symptoms via a temperature check and answering a series of questions related to COVID19 exposure. Campers who show symptoms at during drop off will be asked to return home and reschedule for an event later in the summer.
 - Only the camper may exit the vehicle during drop off. To keep a safe camp environment, we ask that all other family members stay in the vehicle during drop off.
 - Drop off times will be scheduled according to cabin and Family Groups.
- Departing Camp
 - Campers will be assigned a check-out time at increments. Camper families will receive scheduled departure time two weeks prior to camp.
 - Campers will be packed and ready for pick up at the scheduled departure time.
 - Like a school pick up line, one-by-one parents/guardians will pick up their camper(s) once they've signed them out and received any medications from the Camp Nurse.
 - Counselors will be available to help load luggage so that all family members can remain in the car during pick-up.
 - A closing worship attended by families will not be permitted at any program this year. We encourage families to ask your camper(s) all about their camp experience on the drive home and throughout the weeks to come.

Gathering, Visitors and Off-Site Trips

- Visitors not essential to the summer program will be limited during summer 2021. Any visitors to the site will be expected to follow camp guidelines and will not be permitted to directly interact with campers/staff.
- Some of our adventure-based activities require going off site. Off-site trips will be limited to areas where campers have a low chance of interacting with the public. Campers/staff will maintain the same social distancing guidelines while traveling off site.

Designated COVID19 Point of Contact

- While at camp, the camp nurse or health officer will be the on-site designated individual responsible for responding to COVID19 health concerns of all campers, staff, and volunteers.
- If COVID19 concerns are raised after a camper, staff, or volunteer has left their camp session, the Center Director will be the designated individual responsible for responding to COVID19 health and safety questions.

Communication Systems

- If a staff, volunteer, or camper has any one the following COVID19 risk: (1) symptoms of COVID19, (2) a positive test for COVID19, or (3) were exposed to someone with COVID19 within the 14 days prior to attending camp, they will self-report through the following communication system:
 - Staff
 - Staff will report any one of the above identified COVID19 risks to the Center Director.
 - Volunteer
 - Volunteers will report any one of the above identified COVID19 risks to the Camp Nurse who will assess the individual and report to the Center Director.
 - Camper
 - Campers will report any one of the above identified COVID19 risks to the volunteer assigned to their cabin group. The volunteer will report to the nurse who will assess the individual and report to the Center Director.
- In the event that a symptomatic camper is identified, the parent/guardian will be notified and the camper will be picked up from camp and sent home for testing. The camper will not be permitted to return to camp while awaiting test results. Center Directors will also notify the Conference Communications Director and Conference Director of Camp and Retreat Ministry.
- In the event that a symptomatic individual is identified and sent home for testing, the remainder of their Family Group will be isolated at camp while awaiting results of the individual's COVID19 viral rapid test. Isolated Family Groups will still be able to fully participate in camp activities and meals, but extra caution will be taken for sanitizing space and objects, and physical distancing will be maintained between other Family Groups. Parents/guardians of the isolated Family Group will be notified by the Center Director, Camp Nurse, and support staff and given the choice to come to camp to pick up their camper or allow their camper to remain at camp. Remaining campers will continue to be monitored for symptoms and the affected cabin building will be thoroughly sanitized and ventilated.
- In the event of a confirmed positive COVID19 case, Center Directors will immediately notify the Conference Communications Director and Conference Director of Camp and Retreat Ministry. Center Directors, with the help of the Camp Nurse, Deans, and support staff will call all parents/guardians of campers needing to leave and arrange pick-up times.
- In the event of a camp closure, Directors will immediately notify the Conference Communications Director and Conference Director of Camp and Retreat Ministry. Center Directors, with the help of the Camp Nurse, Deans, and support staff will call all parents/guardians of campers needing to leave and arrange pick-up times.

Shared Facilities

- Summer guest groups will be provided with our Health and Safety Plan and resources and encouraged to follow and utilize them. Guest groups must maintain the Health and Safety Plan when interacting with center staff and when utilizing indoor space.
- Summer guest groups will not interact with any SUSCRM summer program individuals beyond the paid staff.

- Any summer guest group space will be sanitized by trained staff after the groups' departure to ensure cleanliness prior to our summer campers using the space.

- **Staff Training and Back Up Plan**

- On-site training of all paid staff will take place prior to the start of summer season. Training will be led by the Center Director, and will include all camp policies, practices, and procedures as it relates to all camp programs, operations, and the COVID19 health and safety plan.
- As much as possible, staff will be cross-trained in program areas. This will help to carry on the camp program in the case of a staff member becoming ill, showing symptoms, or having been exposed to someone with COVID19.

Preparing for When Someone Gets Sick

- **Isolate and Transport Those Who Are Sick**

- Any camper, staff, or volunteer who is showing COVID19 symptoms that meet the protocols will be moved to an isolated area for comfort and observation.
 - If the Camp Nurse/Health Officer determines the symptoms meet the protocols that necessitate further action, the symptomatic camper, volunteer, or staff will leave the camp event and take a COVID19 viral rapid test.
 - Camper: Parents will pick individual up from the camp event and take them for a COVID19 viral rapid test. The camper will not be permitted to return to camp while awaiting test results.
 - Volunteer: Individual will leave the camp event for COVID19 viral rapid test and await results at home.
 - Staff: Individual will be relieved of duty and take a COVID19 viral rapid test. Individual will quarantine in private quarters awaiting result of COVID19 viral rapid test.
 - In the event that a symptomatic individual is identified and sent home for testing, the remainder of their Family Group will be isolated at camp while awaiting results of the individual's COVID19 viral rapid test. The Center Director, Camp Nurse, and support staff will contact the parents of the members of the camper's Family Group to inform them of on-site isolation of their potentially exposed campers. Parent of remaining campers will have the choice to come to camp to pick up their camper or allow their camper to remain at camp. Remaining campers will continue to be monitored for symptoms and the affected cabin building will be thoroughly sanitized and ventilated.
 - If an individual's COVID19 viral rapid test returns a positive result, the remainder of their Family Group, including counselors, will leave the event and be referred for testing. In the event of a COVID-19 exposure, Directors, with the help of the Camp Nurse, Deans, and support staff will call all parents/guardians of campers needing to leave and arrange pick-up times.
- If, during the same week of one Family Group going home due to a positive viral rapid test, another camper, volunteer, or staff member shows COVID-19 symptoms, all remaining campers and volunteers will be sent home. Directors, with the help of the Camp Nurse, Deans, and support staff will call all parents/guardians of campers needing to leave and arrange pick-up times.
- In the event of a positive test result, the Center Director will notify the health department immediately following receipt of the positive test result and will work with health officials to identify close contacts. Directors will also notify the Conference Communications Director and Conference Director of Camp and Retreat Ministry

- **CDC recommendations for Community Related Exposure**

- <https://www.cdc.gov/coronavirus/2019-ncov/php/public-health-recommendations.html>

- **Clean and Disinfect**

- One extra health and safety volunteer per week has been allowed at each session specifically to ensure that our centers are cleaned and disinfected daily and to assist in cleaning and disinfection should someone become ill.
- If a Family Group is sent home due to confirmed illness, the cabin sleeping area will be vacated for 24 hours. After 24 hours staff will disinfect the sleeping area following CDC guidelines. <https://www.cdc.gov/coronavirus/2019-ncov/community/disinfecting-building-facility.html>

- All other areas the Family Group occupied will be cleaned and disinfected following CDC guidelines prior to another Family Group being permitted into the space.
- **Notify Health Officials and Close Contacts**
 - In the event of a positive test result, the Center Director will notify the health department immediately following receipt of the positive test result and will work with health officials to identify close contacts. Directors will also notify the Conference Communications Director and Conference Director of Camp and Retreat Ministry
 - Appropriate local health officials as listed here:
<https://www.health.pa.gov/About/Pages/State%20Health%20Centers.aspx>

Special Considerations for Overnight Camps

- **Geographical Considerations**
 - The vast majority of our campers come from within the Susquehanna Conference geographical area (Central and Northeastern PA).
 - Local community, church, and household affiliations will all be factors that will be taken into consideration when making pod assignments.
- **Sleeping Arrangements of Six Feet Apart**
 - Camper sleeping arrangements will be specific to each center and facility, however, certain precautions will be applied at all facilities, including:
 - Individual beds shall be arranged to maintain at least 6 feet of distance between each person's head. In the case of bunk beds, this will include a "head to toe" sleeping arrangement with bunks marked as such.
 - Cabins will have windows opened at all times when campers are present. If an exhaust fan is present in a sleeping area, that fan will run for the duration of the sleeping hours to facilitate ventilation.
- **Barriers/Physical Distancing**
 - Floors in communal spaces will be marked off to maintain six feet of space between individuals.
 - Bunks/beds will be marked for the duration of the summer season to ensure proper distancing. Beds that cannot be used because they do not meet distancing will be blocked off. Orientation of campers (head and feet) will also be marked on each bunk.
- **Monitoring Social Distancing and Health Hygiene**
 - Camp Counselors will be trained on proper social distancing and health hygiene prior to camp. Counselors will be responsible for monitoring that campers in their Family Group are following social distancing practices throughout the day.
- **Clean and Disinfect Often with EPA Certified Disinfectants**
 - High touch surfaces and shared use areas will be cleaned and sanitized regularly (daily or more frequently as needed).
 - All individuals will be trained and instructed on the proper use of cleaning and sanitizing products prior to use.
 - All cleaning and sanitizing products will be used and applied according to the manufacturer's directions.
 - In the event of a positive case of COVID19, additional sanitizing will be done in specific areas as needed according to CDC guidelines.
- **Avoid Personal Items in Shared Spaces**
 - Each camper will be assigned an area in the cabin to store personal items. Personal items will not be permitted to be stored in common areas (i.e. bathhouses).
 - Surfaces where personal items are placed in common spaces will be disinfected between uses.
- **Shared Facilities**
 - Our camps are private and are not open for members of the community to freely use the space without prior contact and communication with the Center Director.
- **After Camp**
 - CDC recommends camp staff, volunteers, and campers who are not fully vaccinated get tested with a viral test 3–5 days after traveling home from camp AND stay home and self-quarantine for a full 7 days after travel.

- If camper, staff, or volunteer tests positive for COVID19 within 7 days of leaving camp, Center Director should be notified for contact tracing.
